

# GRANT WRITING FOR SUCCESS

Michael A Sesma, Ph.D., NIGMS/NIH  
Roger G Sorensen, Ph.D., NIDA/NIH

National Institutes of Health  
*Turning Discovery Into Health*

**Or as some may call it...  
Diving into the Unknown**

# Grant Writing for Success

## Writing the Application:

- ◆ Start Planning **EARLY**
- ◆ Develop your good idea
- ◆ Use the NIH webpage ([www.nih.gov](http://www.nih.gov))
- ◆ Talk to your NIH Program Official(s)
- ◆ Provide a good presentation
- ◆ Align with review criteria
- ◆ Identify collaborators
- ◆ Seek advice and feedback from colleagues
- ◆ Funding & peer review

# *Grantsmanship Tips*

*101*

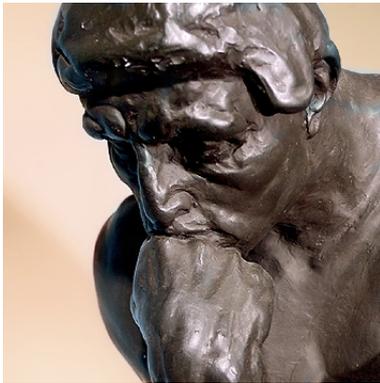

**START PLANNING YOUR APPLICATION  
EARLY**

# *Application Development Strategy*

**Act (Plan)**

**Think**

**Write**

# *So WHY Plan?*

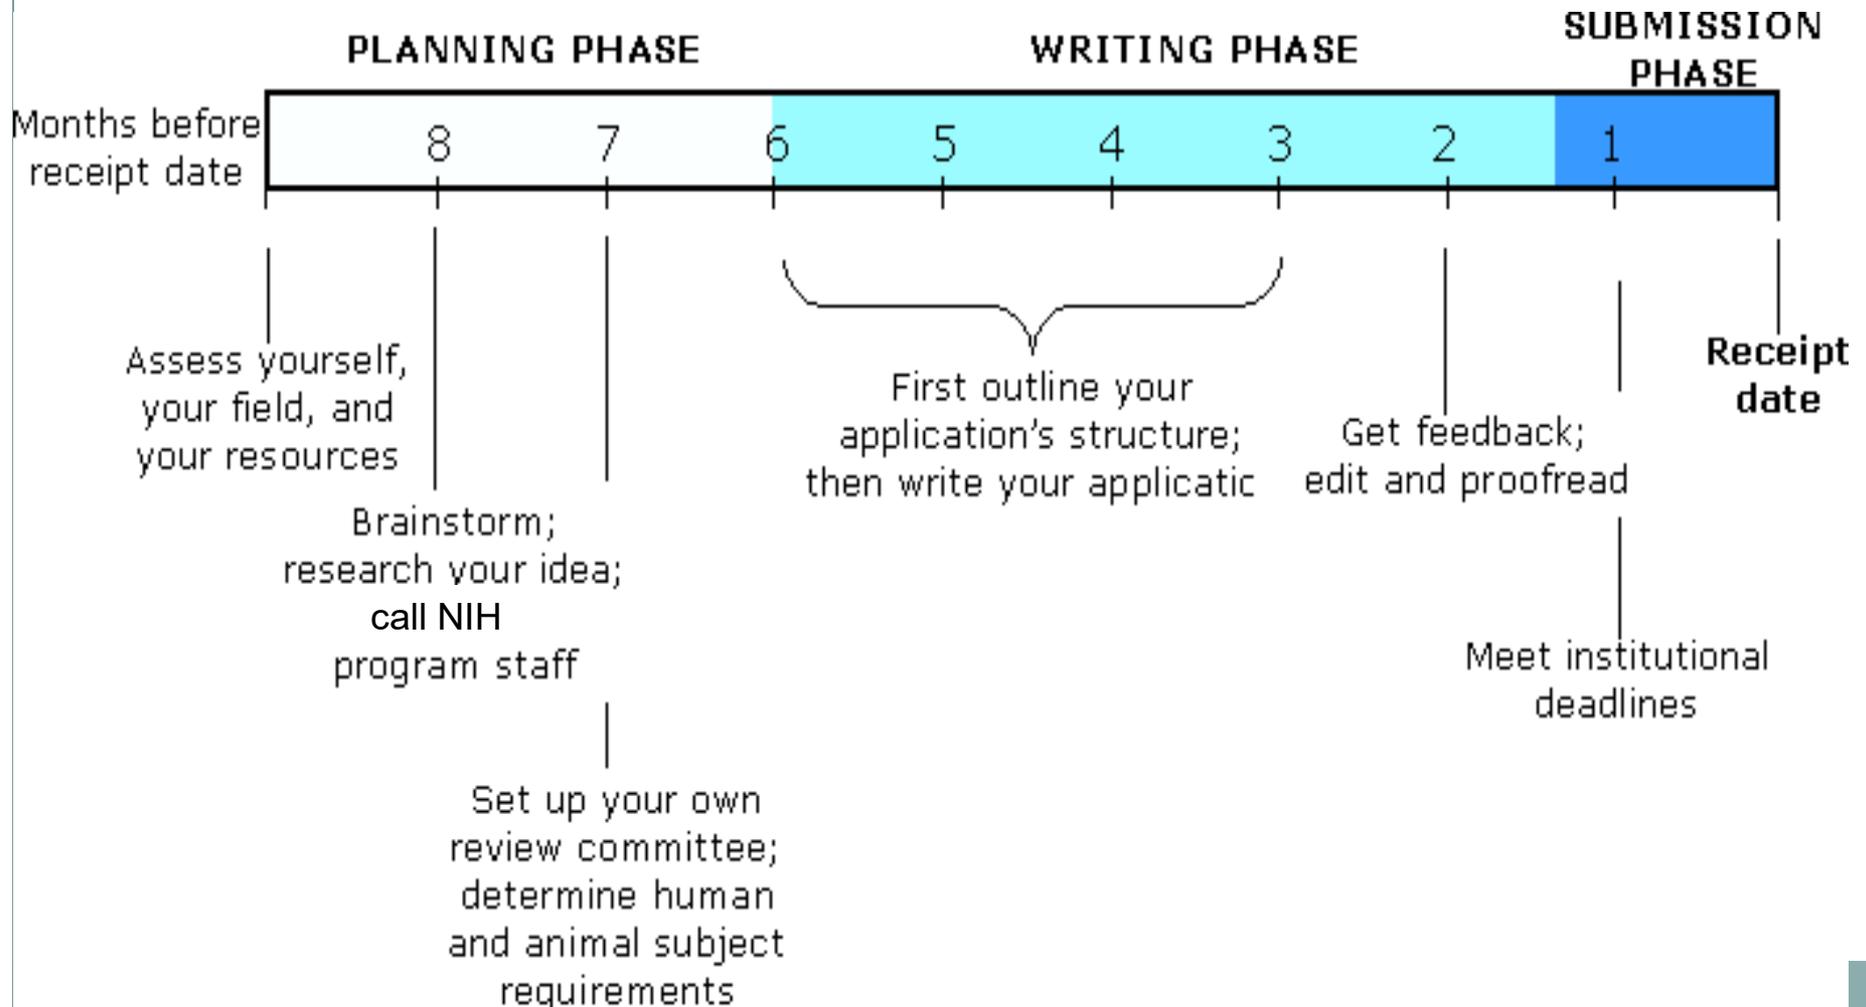

You're more likely to get ...

- A compelling scientific question
- Appropriate NIH Institute
- Appropriate review committee
- Adequate time to complete
  - *A major stress reducer!*

...a better grant application

# Pre-Submission Planning Timeline

# *Grantsmanship Tips*

*101*

**DEVELOPING YOUR GOOD IDEA INTO:**

- ❖ ***STRONG SCIENCE***
- ❖ ***A COMPETITIVE APPLICATION***

# *Getting out of the Deep and to the Top: Components of Successful Applications*

- ◆ Strong Idea
- ◆ Strong Science
- ◆ Strong Application

## *Good Idea*

- Does it address an important problem?
- Will scientific knowledge be advanced?
- Does it build upon or expand current knowledge?
- Is it feasible ...
  - to implement?
  - to investigate?
  - in my hands/lab?

# *Grantsmanship Tips*

*101*

**FURTHER DEVELOPING YOUR GOOD IDEA**

***UNDERSTAND THE MISSION OF THE NIH***

# *Understanding the Mission*

- Mission of each NIH IC is based and defined in law
  - Authorizations (create/continue an agency – periodic)
  - Appropriations (\$ for the agency – annual)
- ICs establish specific research emphases
  - Legislative mission
  - Current state of science
- *Use the Web to find out!*

## INSTITUTES, CENTERS & OFFICES

NIH is made up of 27 Institutes and Centers, each with a specific research agenda, often focusing on particular diseases or body systems. [NIH leadership](#) plays an active role in shaping the agency's activities and outlook. [Learn more about NIH](#) ▶

### NIH OFFICES

#### NIH Office of the Director (OD)

The Office of the Director is the central office at NIH for its 27 Institutes and Centers. The OD is responsible for setting policy for NIH and for planning, managing, and coordinating the programs and activities of all the NIH components. OD's program offices include the Office of AIDS Research and the Office of Research on Women's Health, among others.

# *Grantsmanship Tips*

## *101*

**SEARCHING NIH WEB SITES IS A GOOD START  
*BUT FOLLOW UP WITH PERSONAL CONTACT***

- ❖ **Contact NIH program staff *early***
- ❖ Ask what information would help them advise you about IC interest & “goodness of fit”
- ❖ Are there related FOAs?

# *Grantsmanship Tips*

## *101*

### **ARE YOU READY TO WRITE?**

- ❖ **GRANT WRITING IS A LEARNED SKILL**
  - ❖ Writing grant applications, standard operating protocols and manuals of procedures that get approved are learned skills
  - ❖ Writing manuscripts that get published in peer reviewed journals is a learned skill
  
- ❖ **GRANTSMANSHIP IS A FULL TIME JOB**
  - ❖ Learn about the grant application process

# *Principles of Success*

- **Understand the agency mission**
  - *Every IC is different!*
- **Understand the peer review process**
- **Secure collaborators (mentors) to complement your expertise and experience**
  - *Don't compete ... collaborate!*
- **Learn and practice the skills of writing applications for grant funds**

# *Remember ... Before you start*

- Talk to Program Staff at appropriate IC
- Read instructions for application form
  - *SF 424 R & R*
- Are you a New or Early Stage Investigator?
  - [http://grants.nih.gov/grants/new\\_investigators/index.htm](http://grants.nih.gov/grants/new_investigators/index.htm)
- Know your audience
  - Which Integrated Review Group (IRG) is most likely to get your application?
- *Propose research about which you are **passionate** and totally committed to doing*

# Diving Deeper into Good Grantsmanship

# Grantsmanship Tips

101

**GOOD IDEAS,**

**PRESENTED CLEARLY,**

**IS PARAMOUNT**

## 3 Simple Steps

# Presentation Matters

## 3 Simple Steps

- Read the application instructions carefully
- Read the application instructions carefully
- Don't forget ...

*... read the application instructions carefully*

## Develop a Strong Research Plan

# Presentation Matters

## Specific Aims

- Grab the reader immediately
- State long-term objectives AND expected impact
- Explicitly state hypotheses and research question

## Develop a Strong Research Plan

# Presentation Matters

## Preliminary Studies/Progress Report

- How previous work -- by you, your team, and others -- leads to this study
- Demonstrate your experience, competence and likelihood of continued success
- Must flow logically from literature review and major themes of the problem area

## Develop a Strong Research Plan

# Presentation Matters

## Approach

- Does your plan flow logically from the literature review and prior studies?
- How will each hypothesis be tested?
- Do your measures capture the variables needed to test hypotheses?
- Why did you choose those measures?
- Methods and analyses must match

# Develop a Strong Research Plan

## Presentation Matters

### Approach

- For clinical studies be explicit and thorough in discussing
  - intervention or system to be studied
  - target population
  - inclusion and exclusion criteria
  - independent and dependent variables
  - all measures and instruments
  - power analyses

## Develop a Strong Research Plan

# Presentation Matters

## Common Miscues:

*Failure to ...*

- Document why the problem is important
- Distinguish empirical findings from speculation
- Critically analyze key themes in literature
- Consider alternative perspectives
- Read, understand, and cite the crucial studies

# Grantsmanship Tips

101

## **ALIGN YOUR APPLICATION WITH THE REVIEW CRITERIA TO MAXIMIZE IMPACT:**

- ❖ Significance
- ❖ Investigator
- ❖ Innovation
- ❖ Approach
- ❖ Environment

# *Align with Review Criteria*

- 1. Overall Impact**
- 2. 5 Core Review Criteria:**
  - Significance
  - Investigator
  - Innovation
  - Approach
  - Environment

<http://grants.nih.gov/grants/guide/notice-files/NOT-OD-09-025.html>

<http://grants.nih.gov/grants/guide/notice-files/NOT-OD-09-024.html>

# Review Criteria for Career Development Awards

- Candidate
- Career Development Plan Goals and Objectives
- Research Plan
- Mentor(s), Co-mentor(s), Consultants, Collaborators
- Environment & Institutional Commitment to Candidate

Review Criteria compared:

[http://grants.nih.gov/grants/peer/guidelines\\_general/Review\\_Criteria\\_at\\_a\\_glance.pdf](http://grants.nih.gov/grants/peer/guidelines_general/Review_Criteria_at_a_glance.pdf)

# *Final Priority Score*

## **OVERALL IMPACT**

The likelihood for the project to exert a sustained, powerful influence on the research field(s) involved:

- in consideration of the following five core review criteria, and
- additional review criteria (as applicable for the project proposed)

**Address this on your Specific Aims page!**

# *Align with Review Criteria*

<b>Scored Criteria</b>	<b>Application</b>
<b>Significance</b>	<b>Research Strategy</b> <b>a. Significance</b>
<b>Investigator(s)</b>	<b>Biosketch - Personal Statement</b> <b>Letters of Support</b>
<b>Innovation</b>	<b>Research Strategy</b> <b>b. Innovation</b>
<b>Approach</b>	<b>Research Strategy</b> <b>c. Approach</b>
<b>Environment</b>	<b>Facilities &amp; Other Resources</b>

## *Core Review Criterion #1*

### **SIGNIFICANCE**

- Does this study address an important problem?
- If the aims are achieved, how will scientific knowledge be advanced?
- What will be the effect on concepts or methods that drive this field?

## *Core Review Criterion #2*

### INVESTIGATOR

- Are the investigators appropriately trained and well suited to carry out this work?
- Is the work proposed appropriate to the experience level of the principal investigator and other researchers?
- Does the investigative team bring complementary and integrated expertise to the project (if applicable)?

## *Core Review Criterion #3*

### INNOVATION

- Does the project employ novel concepts, approaches or methods?
- Are the aims original and innovative?
- Does the project challenge existing paradigms or develop new methodologies or technologies?

## *Core Review Criterion #4*

### APPROACH

- Are the conceptual framework, design, methods, and analyses adequately developed, well-integrated, and appropriate to the aims of the project?
- Does the applicant acknowledge potential problem areas and consider alternatives?

## *Core Review Criterion #5*

### ENVIRONMENT

- Does the scientific environment in which the work will be done contribute to the probability of success?
- Do the proposed experiments take advantage of unique features of the scientific environment or employ useful collaborative arrangements?
- Is there evidence of institutional support?

# *Other Review Considerations*

- Human subjects
- Animal care and use
- Select agents
- Model organism sharing plan
- Data sharing plan

The FOA will list the review criteria and any additional issues that reviewers will be asked to evaluate.

# *Grantsmanship Tips*

*101*

## ***IDENTIFY COLLABORATORS***

- **COLLABORATE WITH OTHER INVESTIGATORS**
  - Fill gaps in your expertise and training
  - Add critical skills to your team
- **“TEAM SCIENCE” CAN BE POWERFUL**

# *Multiple Principal Investigators*

- Single PI model does not always work well for multi-disciplinary, collaborative research
- Recognizes contributions of full team
- In place for most submissions to *Grants.gov*
- Implications for “New Investigator” status
- A complex issue – *Talk to NIH program staff if you are considering multiple PIs !*

[grants.nih.gov/grants/multi\\_pi](https://grants.nih.gov/grants/multi_pi)

# Grantsmanship Tips

101

## **GET FEEDBACK**

**SHOW YOUR DRAFT APPLICATION TO A COLLEAGUE**

**SHOW YOUR DRAFT APPLICATION TO A COLLEAGUE... WHO DOES NOT ALREADY KNOW WHAT YOU INTEND TO DO**

**SHOW YOUR DRAFT APPLICATION TO A COLLEAGUE... WHO IS NOT YOUR BEST FRIEND**

# Grantsmanship Tips

## 101

### **YOUR DRAFT REVIEWERS NEED TO UNDERSTAND**

- ❖ What you intend to do
- ❖ Why you believe it is important to do
- ❖ Exactly how you are going to do it

**IF THEY DON'T GET IT, YOU MUST REVISE YOUR APPLICATION.**

**LEAVE ENOUGH TIME FOR REVISIONS**

# *Grantsmanship Tips*

*101*

**PROVIDE A GOOD PRESENTATION**

**TO ACHIEVE A GOOD REVIEW**

## *Keys to Good Presentation*

- Be realistic ... not overly ambitious
- Discuss potential problem areas and possible solutions
- Be explicit
  - Reviewers cannot read your mind!
  - Don't expect reviewers to read between the lines
  - Don't assume they know what you intend!

## *Good Review*

### *Get to the right review group*

- Title, abstract, specific aims all point to the main goals of your project
- Attach a cover letter for the Center for Scientific Review Division of Receipt and Referral
  - suggest IC and review group assignment\*
  - outline areas of key expertise needed for appropriate review
  - do not name specific reviewers

\* Consult with Program Official

## *Good Review*

### *Understand the dynamics of peer review:*

- Reviewers will review many applications
- Make your application easy to read and easy to understand
- The impact and significance should be clear throughout the application
- Convince them to be your advocate
  - *Get them on your side!*

# *Grantsmanship Tips*

*101*

## ***GUIDANCE FOR A COMPETITIVE GRANT APPLICATION***

# *Hallmarks of an Outstanding Grant Application*

- ◆ Strong significance to an important problem in public health: IMPACT is high
- ◆ High degree of novelty and innovation
- ◆ Strong track record by a well qualified applicant
- ◆ Clear rationale
- ◆ Relevant and supportive preliminary data
- ◆ Clear and focused approach that provides unambiguous results
- ◆ Careful attention to details
  - Spelling, punctuation, grammar, fonts, clarity of data, error bars, spelling, etc

# *How to assure that your application is competitive?*

- Good ideas, well presented always win
- Think clearly
- Write clearly
- Be complete but not verbose
- Never lose sight of the significance
- Point to the impact
- Pay attention to details

# *Common Reasons Cited for a Weak Application*

- ◆ Lack of or weak impact
- ◆ Significance not obvious or weak
- ◆ Too ambitious, lacking focus
- ◆ Unclear or flawed hypothesis or rationale
- ◆ Applicant track record weak or lacking appropriate expertise
- ◆ Feasibility unsupported
- ◆ Approach flawed
- ◆ Poor writing

# *Grantsmanship Tips*

*101*

***FUNDING DECISIONS***

# *What Determines Which Applications Are Funded?*

- Scientific merit
- Program considerations
- Availability of funds

# Remember how applications become grants

- Funding Decisions are based on:
  - scientific merit and impact
  - program considerations
  - available funds
- Funding Decisions are made by the Institute Director

# *Grantsmanship Tips*

*101*

***AFTER PEER REVIEW***

# After the Review

- Read the summary statement
- Reread the summary statement
- **Contact your program officer and be prepared to discuss:**
  - what the reviewers said about your application (after you have summary statement)
  - Scores and percentiles
  - the likelihood of funding
  - the prospects of a revised application
- Wait for the AWARD, or
- Listen to advice from Program Officer about options

# If Not Funded, Try Again!

- You are in good company
- Know your options
- Get advice, Regroup
- Contact your Program Officer

# Revise and Resubmit

- Properly Revised applications can receive fundable scores and subsequent \$\$
  - Score can inform degree of revision necessary
- **Update Preliminary Results**
- Maintain communications with Scientific Review Officer and Program Official

Notice NOT-OD-14-074: NIH and AHRQ Announce Updated Policy for Application Submission

# Revising and Resubmitting

- Write A Clear Introduction Section
- Address All Criticisms Thoroughly
- Respond Constructively
- Acknowledge and Accept the Help of Reviewer Comments
- **Don't Be Argumentative!**
- **Don't be Abrasive or Sarcastic!**

# Responding to reviewer comments

**Q:** What if you know that you are “**Right**” and the reviewers are “**Wrong**”, is it appropriate to argue your position in your resubmission

**A: NO!**

**Remember**

- An application for funding is not about the facts of your completed research.
- It is about ideas and potential research
- **DO NOT be Argumentative !**
- **DO NOT be Abrasive !**
- **DO NOT do longterm damage to yourself**

# Revise and Resubmit

## Prepare a REVISION COVER LETTER

- For Revisions, Indicate Review History
- Request Same Or Different Study Section
- Provide Justification for your request
- Don't be Argumentative ! Never!
- Don't be Abrasive ! Never!

***"Simple can be harder than complex. You have to work hard to get your thinking clean to make it simple. But it's worth it in the end, because once you get there, you can move mountains."***

**Three Simple Rules to  
remember when  
planning, writing and  
submitting your  
application**

# #1

**DO NOT** write the application for  
yourself  
Unless you are going to fund it  
yourself

You **MUST** convince  
the entire review committee  
and the funding agency the proposed research  
will be of high impact and feasible

# #2

Reviewers are never wrong,  
Reviewers are never right:

they simply provide an assessment of material that  
you provided in your application

Don't Take the Criticism Personally!

# #3

If you are revising the application the comments in the summary statement only list some of the weaknesses .... not all of the weaknesses.

When you revise your application use the time as an opportunity to improve the entire application.

# Additional Supporting Material

## **Examples**

**Reviewers' Concerns taken from Grant Applications and Summary Statements**

# *Top 10 Common Reviewer Concerns*

**.....or How Not To  
Get DINGED!**

# 1

There is not a  
**CLEAR HYPOTHESIS, or**  
**WELL DEFINED GOALS**

- Provide a focused hypothesis, objectives
- Describe the importance and relevance of your problem
- Be clear on how your project will move the field forward

# 2

The specific aims do **NOT TEST** the Hypothesis, or

the specific aims **DEPEND** on results from previous aims

- The best proposals are those with independent specific aims that address your hypothesis using different approaches

# 3

The proposal is  
**NOT MECHANISTIC, or**  
**NOT SCIENTIFICALLY RELEVANT**

- Do not propose correlative studies, propose **strong associations**
- Do not propose general observations, propose **specific manipulations**

# 4

This application is not  
**APPROPRIATE** for the  
**GRANT MECHANISM**

- A R21 is NOT a R01
- A Career Development Award (K) is NOT a Research Project Grant (R)

# 5

The proposal is  
**OVERLY AMBITIOUS**

- Set realistic goals for the budget and project period you propose

# 6

## PRELIMINARY DATA is lacking

- Include preliminary data for all aims
- Use preliminary data to show knowledge of methods and data analyses
- But DO propose more than just confirming preliminary results

# 7

I'm not sure that the  
Investigator can do the  
**PROPOSED EXPERIMENTS**

- Don't propose what you can't do
- Include Collaborators and Consultants on your project
- Describe the value of datasets and experimental models

# 8

The background section is **MISSING KEY** publications and experimental findings

- Thoroughly describe the literature, especially controversies, *but....*
  - Support your views and ideas
  - Be sure you have found key references

# 9

Experimental details,  
alternative approaches, or  
interpretation of data

are **INADEQUATELY DESCRIBED**

- Don't assume the reviewers know the methods
- Provide other experimental directions you might use should you encounter problems
- Show the reviewers that you have thought about your research plan

# 10

The Proposal is  
**NOT RELEVANT** to the  
**MISSION** of the Institute

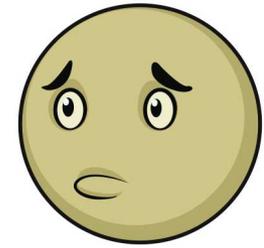

- Make your application FIT the Mission of a particular Institute
- Don't FORCE your application on an Inappropriate Institute

# Additional Supporting Material

**Examples**

**BAD & GOOD GRANTS**

# BAD GRANT

# Grant Example

**Hypothesis:** The goals of this proposal are to identify microRNAs (miRNAs) and elucidate gene networks that regulate limb regeneration. These studies will (1) identify miRNAs that contribute to the regulation of regenerative capacity; (2) identify miRNA-target mRNA pairs involved in limb regeneration; and (3) test selected microRNAs for their ability to promote regeneration.

**Purpose:** Elucidation of microRNA-dependent regulation during amphibian regeneration should identify key molecular components and regulatory steps that could potentially permit the therapeutic activation of regenerative processes in mammals.

# Grant Example

- **SA #1:** Identification of **microRNAs** expressed in intact, regenerating, and non-regenerating limbs.
- **SA #2:** Characterization of **miRNA-mRNA** regulatory interactions
- **SA #3:** **Functional analysis** of selected miRNAs in limb regeneration

# Grant Example

## Reviewer Comments:

- **Unfocused screen** for potential miRNAs that participate in limb regeneration.
- The functional characterization is **less focused and thus more uncertain in outcome**. The potential unique assay offers a tantalizing opportunity, but it would be stronger if a more comprehensive analysis of all candidates were proposed.
- The functional analysis is **diffuse and overly ambitious**. There is a major concern that the results will not lead forward to a more mechanistic understanding of limb regeneration.

# Grant Example

## Reviewer Comments:

- Study in cells is very promising but **extrapolation** to limbs and tissues may be technically challenging.
- Need **discussion of controls**/quantitative effects of method on normal regeneration.
- The method of incorporating agents into *specific tissues* is a very **new method**. None of the PIs have used this method previously; preliminary experiments would strengthen the feasibility of this approach.
- The PI is **new to the regeneration field** and has no funding or publication history in this area

# GOOD GRANT

# Grant Example

**Hypothesis:** *Chronic drug* exposure upregulates the expression of *Factor X*, which triggers and sustains the exocytotic trafficking and surface expression of functional *Receptor A*

**Purpose:** To investigate the **molecular mechanisms** for *Factor X*-induced *Receptor A* trafficking

# Grant Example

- **SA #1:** Determine the **signaling pathways** mediating *Factor X*-induced *Receptor A* trafficking
- **SA #2:** Determine *Factor X* involvement in *drug*-induced *Receptor A* **trafficking**
- **SA #3:** Determine the **synaptic sites** of *Receptor A* trafficking and *Receptor A-B* interactions
- **SA #4:** Determine the **behavioral significance** of emergent *Receptor A* and behavioral *Receptor A-B* interactions

# Grant Example

## Reviewer Comments:

1. Strengths are numerous and include novel and innovative hypotheses, sound experimental design using multidisciplinary approaches, a highly qualified investigator and research team, and a high likelihood of meaningful findings
2. Strengths include the significance of the central hypothesis, the well-designed experimental plan, supportive preliminary data ....
3. ..the rationale for the studies are clearly delineated, appropriate controls are in place, scope of the studies is appropriate, and there is ... complete discussion of possible limitations of some approaches and how findings will be interpreted
